Buildings with an estimated construction cost in excess of one million dollars shall have a 1% contingency for the purchase of public artwork. NAU has jurisdiction over all artwork specification and works directly with user group representatives during the selection process.

If easily accessible, window coverings can be manually operable; otherwise, coverings must be motorized with controls located at the instructor’s workstation on the AV touch panel. Where applicable, the depth of the window should be designed to allow for the installation of motorized shade tracks.

Vertical blinds and drapes are not desired. If necessary, they are to have non-plastic, heavy-duty operating components.

All window treatments are required to have a non-reflective matte finish and unless otherwise specified, the color selection should match or blend with the window frame.

Horizontal blinds are permitted, pending submittal review and approval by NAU.
### Window Shades

**12 24 00**
**Window Shades**
Roller Window Shades

Use of a light diffusing and room darkening (where applicable) roller shades are preferred. Percentages of light diffusion will be determined for each window by evaluating the individual window’s orientation and the intensity of the exposure.

### FURNITURE

Furniture selection is dictated by NAU standards for classrooms and office spaces. Furniture is to be procured thru the Tri University contracts available at the NAU purchasing department. All final furniture selections are to be reviewed and approved by NAU PDC Interiors Department prior to order placement. All furniture drawings shall be reviewed for code compliance prior to final specification. For additional information refer to the *NAU Classroom and Office Design Guidelines*.

NAU Facility Services Planning, Design and Construction Department shall assist the Design Professional with the selection of contract products based on their requirements. Drawings, furniture plans and electrical plans, and furniture specifications are to be provided to NAU for review and final approval. The furniture specifications are to be provided with the information per item listed here.

Office Furniture

Case Goods

Open Office Furniture

Integrated options to be available in selected system

a. Height Adjustment – Adjustable worksurfaces from 24 ½” to 52” height
b. Edge Detail – 3MM plastic edge, Bullnose or sloped edge; no laminate self edge
c. Cable Routing – Cable management system integral to the product
d. Privacy – Privacy screens and modesty panels required
e. Worksurfaces – Rectangular and curvilinear required
f. Storage – Pedestal storage to include box and file drawers with mobile option
g. Storage – Vertical Cabinets stand alone & over desk storage open or closed (desk mounted)
h. Worksurface – Laminate covered particle board or steel core
i. Cord Cutouts or Grommets shall be available on all worksurfaces
j. Levelers – Leveling glides required on all support legs with minimum ½”
   adjustment
k. Size – Minimum requirement depth desk unit 24” to 36”
l. Size – Minimum requirement width desk 30” to 72”

Wood Case Goods

Integrated options to be available in selected casegood

a. Desk
b. Return
c. Credenza
d. Bridge
e. Bullet table
f. Lateral file
g. Bookcase
h. Service module

Specifications

a. Full height back panel and pedestals
b. Wood drawer interior
c. One hanging file folder frame per drawer
d. Leveling glides
e. Pencil tray

Plastic Laminate Case Goods

Integrated options to be available in selected casegood

a. Desk
b. Return
c. Credenza
d. Bridge
e. Bullet table
f. Lateral file
Section  Number
Title

12 51 19  Filing Cabinets
Integrated options to be available in selected storage
LATERAL FILES
a. Steel construction
d. Available Multiple widths (30”, 36” & 42”)

b. Available Front to back or side to side drawer configuration
c. Locking
e. Available in multiple heights (26 1/4” to 62 3/4”) (minimum)
f. Leveling glides
g. Laminate top option
h. Safety interlock to open one (1) drawer at a time

STORAGE CABINETS
a. Steel construction
c. Locking
d. Available in multiple heights 26” to 65” minimum
e. Available in Multiple widths
f. Available in 18” depth (minimum)

12 51 21  Tables
Integrated options to be available in selected table style
a. Round Top diameters (30” to 60") (minimum)
b. Square Top dimensions (30”X30”) to (48”X48”) (minimum)
c. Rectangular Top dimensions (24”X48”) to (30”X72”) (minimum)
d. Laminate Top
e. Leveling Glides
f. Chrome Base Option
g. Caster option for smaller tables

Specifications
f. Full height back panel and pedestals
g. Wood drawer interior
h. One hanging file folder frame per drawer
i. Leveling glides
j. Pencil tray
Seating

High Performance Ergonomic Task Seating
Integrated options to be available in selected chair style
a. Adjustable seat angle
b. Adjustable back angle, tilt and vertical adjustment
c. Adjustable seat depth and tilt
d. Adjustable back height
e. Pneumatic height adjustment
f. Swivel tilt
g. Height, width and pivot adjustable arms
h. Armless
i. Soft arm caps
j. Fully upholstered back panel
k. Available with high and mid back
l. Available in Plus and Small size frames
m. Five arm base w/dual wheel casters
n. Soft and hard wheel casters

Side Seating
Integrated options to be available in selected chair style
a. Sled base
b. Leg base with hard and soft caster option
c. Plastic or poly seat and back
d. Upholstered seat and back
e. Plastic arm caps
f. Frame colors available
g. Chrome frame available
h. Standard back height

Conference seating
Integrated options to be available in selected chair style
a. Five arm base with casters
b. Leg base with caster option
c. Fixed arms
d. Pneumatic height adjustment
e. Tilt lock
f. Soft arm caps
Systems Furniture

Panel-Hung component Systems Furniture

Integrated options to be available in selected system

a. Compliance with ANSI/BIFMA X5.6-2003 for all panels, components, wiring & lighting.

b. The Entire System shall be U.L. approved.

c. The complete system shall be of one (1) product manufacturer.

d. Panel Types

i. fabric covered acoustical panel

ii. glazed panel

iii. door panel

iv. pass through panel

v. tackable acoustical panel

e. Panel Size – fabric covered shall be available in six panel heights ranging from 30” to 80” and at least six (6) panel widths ranging from 18” to 60”. Panels shall be a minimum of 2 ¾” thick.

g. Attachment to Walls – Panels shall have provisions for attachment to permanent walls when required.

h. Panels shall have 1” incremental hanging capability for worksurfaces, bins and shelves inherent in the panel frame for the full height of the panel.

i. Cover Material – Fabric covered panels shall be covered on front and back. The fabric shall be of a woven texture; colors shall be available in muted tones (preferably grays, beige etc.)

j. Installation/Reconfiguration – Panel systems shall be capable of being moved and reinstalled easily without the use of highly specialized tools.

k. Cleaning – All surfaces of the system shall resist stain and be easily cleaned.

l. Modification – The system shall be capable of adding electrification components in the field at some future time with a minimum of panel modification.

m. Finish Detail – The system shall be void of sharp-edged components

n. Core Construction – Core construction shall allow panel to be rigid and capable of supporting loaded components. Core construction shall not allow for flexing or torquing of panel. Panel system strength should be strong without the use of floor supported products (peds, end panels, lateral files, etc.). Counterbalance of system components should not be required.

o. Sound Resistance – Acoustical panels shall have a minimum of .80 NCR sound classification as tested in accordance with ASTM, C-423-90a and a minimum STC of 20 as tested in accordance with ASTM, e-413-87 (1994) shall be available within the product line. Tackable acoustical panels shall have a minimum of .65NRC sound classification as tested in accordance with the above standards.
p. Fire Resistance – All panels shall have Class A fire rating as tested in accordance with ASTM, E84-96a.

q. Connectors – Panel connectors shall be re-usable where necessary to connect adjacent panels to form the panel structure. Panel connectors shall be made of strong materials. The system shall have simple rigid connections.

r. Edges & Fillers – All panel edges not joined to another panel shall be provided with a finished end cap. Corner fillers shall be used at all junctions between panels.

s. Trim – All vertical trim shall be of metal frame and painted. Vertical side frames shall have concealed painted inserts slotted up to 1 1/2” centers to maximize vertical utilization of components. The panel top shall be trimmed with a vinyl; steel, wood or fabric-covered extrusion cap and shall match the system color scheme.

t. Levelers – A minimum of two (2) panel supported levelers shall be used to provide a rigid panel system and shall have the capability top level panels on an uneven floor. Levelers shall support the weight of the system. Levelers shall have a minimum vertical adjustment of 3/4”.

u. Raceways – Raceways shall be at the top and the bottom of panels. Raceways shall be either integral or capable of being integrated into panels. Cabling within the raceway shall be concealed at all junctions between panels. Raceways shall make provisions for distribution of electrical wiring to run adjacent to data and telephone cabling. Electrical wiring shall be mechanically isolated if not shielded or in conduit.

v. Electrical Requirements – The minimum electrical requirement shall be for a 4-circuit 8-wire system. Panels with raceways that are 24” or wider, shall have a minimum of two (2) receptacles per side and have space available for an additional port for installation of data and telephone receptacles. Electrical systems offered shall be 102v, 20 amp circuits capable of transitioning through multiple panel intersections. All receptacles whether simplex or duplex, shall support a minimum of 15 amps electrical load.

w. Power Poles – Power poles shall be available and shall be capable of attaching to the top or the end of a panel. Or to a connecting junction and integrating with the panel electrical system.

x. Required Components
   i. Task Lighting - LED type, U.L listed and conforms to the National Electric Code
   ii. Work Surfaces – Shall be either steel or particle board covered with laminate. Particle board to have backer sheet underside. Minimum thickness to be 1 3/4” thick. All exposed edges shall be finished to match the worksurface or have a vinyl edge band
   iii. Work surfaces to be cantilever or floor supported
   iv. Cord Cutouts or Grommets shall be available on all worksurfaces
   v. Storage – Drawers required to include file drawers, box drawers, pencil drawers, pedestals, and flipper door storage cabinets.
vi. Security – All storage with the exception of the pencil drawer shall have the capability of being locked.

12 59 13 Free-standing component Systems Furniture

Integrated options to be available in selected system

a. Height Adjustment – Adjustable worksurfaces from 24 ½” to 52” height
b. Edge Detail – Bullnose, sloped edge, 3mm edge
c. Cable Routing – Cable management system integral to the product
d. Privacy – Privacy screens and modesty panels required
e. Worksurfaces – Rectangular and curvilinear required
f. Storage – Pedestal storage to include box and file drawers with mobile option
g. Storage – Lateral File, counterweights must be included
h. Storage – Vertical Cabinets stand alone & over desk storage open or closed (desk mounted)
i. Worksurface – Laminate covered particle board or steel core
j. Counter Tops – Transaction Worksurfaces
k. Spanner Tables – Worksurfaces to connect workstations
l. Jetty Tables/Peninsula Tables
m. Cord Cutouts or Grommets shall be available on all worksurfaces
n. Levelers – Leveling glides required on all support legs with minimum ½” adjustment

o. Column mounted Shelves and Screens
p. Multiple screen heights for privacy
q. Multiple worksurface offerings for corner and straight units.
r. Desk Size – Minimum requirement depth desk unit 24” to 30”
s. Desk Size – Minimum requirement width desk 24” to 78”
t. Corner Unit Size
u. Storage Towers

y. Required Components

vi. Task Lighting - LED type, U.L listed and conforms to the National Electric Code

viii. Work Surfaces – Shall be either steel or particle board covered with laminate. Particle board to have backer sheet underside. Minimum thickness to be 1 ¼” thick. All exposed edges shall be finished to match the worksurface or have a vinyl edge band

ix. Work surfaces to be cantilever or floor supported

x. Cord Cutouts or Grommets shall be available on all worksurfaces

xi. Storage – Drawers required to include file drawers, box drawers, pencil drawers, pedestals, and flipper door storage cabinets.

xii. Security – All storage with the exception of the pencil drawer shall have the capability of being locked
12 60 00  MULTIPLE SEATING

12 61 00  Fixed Audience Seating
Multiple use fixed seating and tables shall be dictated by user preference and shall be determined, if applicable, during Design Development review meetings.

Manufacturer options are available thru the Tri University contract

When procuring through a General Contractor, shop drawings must be reviewed and approved by NAU PDC Interiors Department.

12 63 00  Stadium and Arena Seating

12 90 00  OTHER FURNISHINGS

12 92 00  Interior Planters and Artificial Plants
12 93 00  Site Furnishings
12 93 13  Bicycle Racks
12 93 23  Trash and Litter Receptors

Lobby Units

Large common area or hallway bins should be the standard lobby units depicted below.

Colors: Blue for recycling and Brown for waste. Lettering and symbols should be white. All panels of the bin should be appropriately colored.

Wording: “Landfill Materials” for waste and “Recycling.” Also, “nau.edu/recycling” should be displayed on the front of the bin below the symbol.

Symbols: The white recycling symbol is to be used for recycling and the white “waste person” symbol is to be used for “Landfill Materials.” There will be a symbol on each side of the bin (top, front, side) excluding the back.

Bins used for the pilot program are Max-R Tuscany Sideload Double Recycling Stations.
Small and Medium Bins

For other areas that do not require the capacity of a lobby unit small and medium recycling and waste bins should be used. As for the lobby units recycling with be blue with a white recycling symbol and waste will be brown with the white “waste person” symbol.

For the recycling pilot the following bins were used:

**Medium Recycling:** Tough Guy Recycling Container, 23 gal, Blue (#4UAU7)

**Medium Waste:** Tough Guy Open-Top Trash Can, Rectangular, 23 gal. (#10F629)

**Small Recycling:** Rubbermaid Recycling Container, 7 gal, Blue (#5M785)

<th>Title</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>Small Waste: Continental rectangular wastebasket, 7 gal, Brown (#2818BN)</td>
</tr>
</tbody>
</table>

**Mini Bins**

In offices there will only be a recycling bin and a mini bin. Only the recycling bin will be serviced by NAU custodial staff. A “mini bin” is given to office occupants so that clearing their own waste to a common area waste bin will be more convenient.
