Enterprise Analytics
(Also known as Pyramid Analytics or BI Office)
Focus/Eliminate data in the dashboard in Enterprise Analytics
How can you Focus on or Eliminate data in the dashboard in Enterprise Analytics?

There may be times where you will want to narrow in on specific data within a dashboard. This is what we refer to as Focusing. For example, using the NAU Daily Enrollment dashboard, on the Admit Types tab, in the Academic Level and Admit Type panel, let’s focus on only the FYR students. To focus on data in the dashboard users should select the data they want to explore by hovering over the FYR students and right clicking.

A pop-up screen will display, select Member Selection and Focus:
The chart will change to Focus only on the FYR students:

(See panel Reset instructions to return to the original state)

To eliminate data from a chart/graph, hover over the data (FYR), right click, member selection and Eliminate the data.
<table>
<thead>
<tr>
<th>Level and Admit Type (All Campuses, All Careers, All Concurrency)</th>
<th>High School Concurrent</th>
<th>Freshman</th>
</tr>
</thead>
<tbody>
<tr>
<td>First Year (FY)</td>
<td></td>
<td>Fall 2015</td>
</tr>
<tr>
<td>Transfer (TRF)</td>
<td></td>
<td></td>
</tr>
<tr>
<td>Internal 0-2 College (INF)</td>
<td></td>
<td></td>
</tr>
<tr>
<td>Internal 24+ College (INT)</td>
<td></td>
<td></td>
</tr>
<tr>
<td>Internal (IN)</td>
<td></td>
<td></td>
</tr>
<tr>
<td>New (NEW)</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

- Interaction (Shift + Click)
- Drill Down (Click)
- Drill Up
- Drill to Level
- Dice
- Expand Down (Ctrl + Click)
- Collapse
- Member Selection
- Quick Sort
- Quick Filter
- Action List
- Conditional Formatting
This time we eliminated the FYR students:
