FACILITIES & OTHER RESOURCES

Northern Arizona University
Northern Arizona University (NAU) is committed to providing and ensuring that adequate facilities, equipment, administrative support, and other resources are available to ensure that project investigators and associated staff are able to carry out project goal and objectives. All project investigators possess desktop and laptop computers with the latest software for word processing, desktop publishing, statistical computation, database management, and budget monitoring in their individual offices as well as ample access to in-department printing. The investigators have individual telephone numbers and access to state and national long-distance services. A copy machine is available for investigators in their respective departments.

Scientific Environment
Founded in 1899, Northern Arizona University is a public, high research activity university that has a commitment to professional programs including those in education, the health professions, environmental sciences, sustainable technologies, and selected areas of the biosciences.

Library resources
The Cline Library is located on campus and is more than 200,000 square feet and includes a four hundred seat assembly hall. The library includes more than 1,400,000 volumes, including 560,000 books; 240,000 government documents; 35,000 maps; 373,000 microforms, 18,000 sound recordings, 10,000 videos, films and other non-print-media; and 136,000 bound periodical volumes.

Technology support
Information Technology Services (ITS) is a university service organization dedicated to the computing, networking and telecommunication needs of the university community. They provide infrastructure and support services to faculty, staff, and students; on the Flagstaff campus and statewide.

Grant Support
The Office of Grant and Contract Services (OGCS) is administratively responsible for the submission of proposals, negotiation and acceptance of awards, and non-financial post-award administration of sponsored projects that support research and creative activities, instruction, and public service programs.

Pre-Award Responsibilities
The Office of Sponsored Projects (OSP) facilitates sponsored projects and other programs between the University community and external sponsors such as federal, state and local governments, and private sector sponsors such as foundations and corporations. OSP is responsible for assisting principal investigators in identifying and responding to funding opportunities, reviewing and assuring compliance with sponsor and university requirements (including fiscal and non-fiscal compliance areas); submitting applications and proposals on behalf of the University; supporting large interdisciplinary, multidisciplinary and/or multi-institutional collaborations; interpreting the regulations of state and federal agencies and private sponsors; and clarifying University policies and procedures for faculty and sponsors. OSP also is responsible for accepting awards and has the responsibility to negotiate awards that protect the rights of faculty, staff, and students to use, publish and otherwise disseminate the results of their creative activities, and that comply with university and sponsor laws, regulations, and policies, including those of the state and federal government.
Post-Award Responsibilities
Post Award Accounting Services and Fiscal Compliance (PAASFC) has the institutional responsibility for assuring the Arizona State Board of Regents (ABOR), the public, and the Federal government that the University has in-place systems and best practice for fiscal accountability and internal controls for sponsored projects funds awarded to the University. PAASFC’s responsibility is to provide post-award fiscal and administrative support to the University community while ensuring regulatory compliance with NAU, State, Private and Federal Policies, Procedures and guidelines. OGCS works with PAASFC to ensure that all required reports are submitted, including technical and final reports and invention reports, with PAFS having primary responsibility for financial and property reports.

College of Health & Human Services
The College of Health & Human Services (CHHS) consists of the School of Nursing and six departments including Dental Hygiene, Health Sciences, Communication Sciences & Disorders, Physician Assistant Studies, Occupational Therapy and Physical Therapy/Athletic Training. CHHS has programs located in Flagstaff on the NAU campus, in downtown Phoenix at the shared University of Arizona/NAU Biomedical Campus and at multiple campuses across the state. The CHHS administrative offices are located on the NAU Flagstaff Mountain Campus in the 61,617 square foot Health Professions Building with other teaching and research facilities located in Rolle Gymnasium 47,956 sq. feet, School of Nursing 20,013 sq. feet and the new Phoenix Biomedical Campus building.

The Phoenix Biomedical Campus
The Phoenix Biomedical Campus (PBC) spans 28 acres in downtown Phoenix and boasts more than six million square feet of research, academic, and clinical facilities.
